## INTRODUCTION

Relocated in April, 1990 our factory is ideally situated in geographical terms at the site in Numazu Industrial Complex that has an easy access to the Numazu interchange of the Tomei Expressway and JR Shinkansen Mishima railroad station.

Our factory, relocated to the present site in 1990, is equipped with sophisticated state-of-the-art machine tools to meet customers' unceasing and growing technological demands on precision, cost-energy saving such as less floor space, less electrical power, less maintenance cost and easy handling of our products.

Challenge is our word and our motto is to better serve our customers with quality service to get satisfaction to fullest degree. In this momentous times business environment is rapidly changing. Innovations in technology that were unforeseen a short while ago are now leading the industries that are changing our modus vivendi.

Our experimental equipment furnished in the factory for product tests are available for customers to perform their series of experiments of their own by utilizing our facilities and our technical assistance if needed, basically without charge.
